

Traffic & Infrastructure

- Freight corridor governance
- Intelligent traffic flow management
- Traffic sensing, communication & actuating systems
- User friendly design & construction
- Durable road structures

Logistics & Infrastructure

- Seamless co- & inter-modality
- Real time logistics planning
- Logistics business models
- Load factor, off peak benefits
- Intelligent logistics & e-freight

ENTERING
GREEN CORRIDOR
CHECKING
TRANSPORT CRITERIAS

Driver support & ICT

- Harmonised ICT solutions
- V2V & V2I for safety, eco-mobility
- Real time traffic data
- Driving and handling support functions
- Automated driving – platooning

Load units & vehicles

- Tailored for goods carried (weight & dimensions)
- Specified & optimized for green corridors & hubs
- Equipped with sensors for safety, load & function
- Sustainable energy & power-trains (e.g. CORE)
