

Urban silent & efficient cleaning system

Street sweeper and high demanding absorber

Recycle & waste collector in pedestrian areas

Modular light concept with flexible and multiple uses

Snow city removal
De-icing & anti-icing

Pollutant detection and removal

Pavement imperfections and maintenance needs detection

Urban silent & efficient cleaning system

Quiet streets and cleaner air

Light concept and flexible solutions

Smart sensors for small pollutant detection and optimization of cleaning protocols

Detection for diagnosis and air quality improvement

Electric APU specific for the cleaning procedure

Electric system for basic operation

Development of efficient and quiet cleaning systems

Low noise

Highly efficient

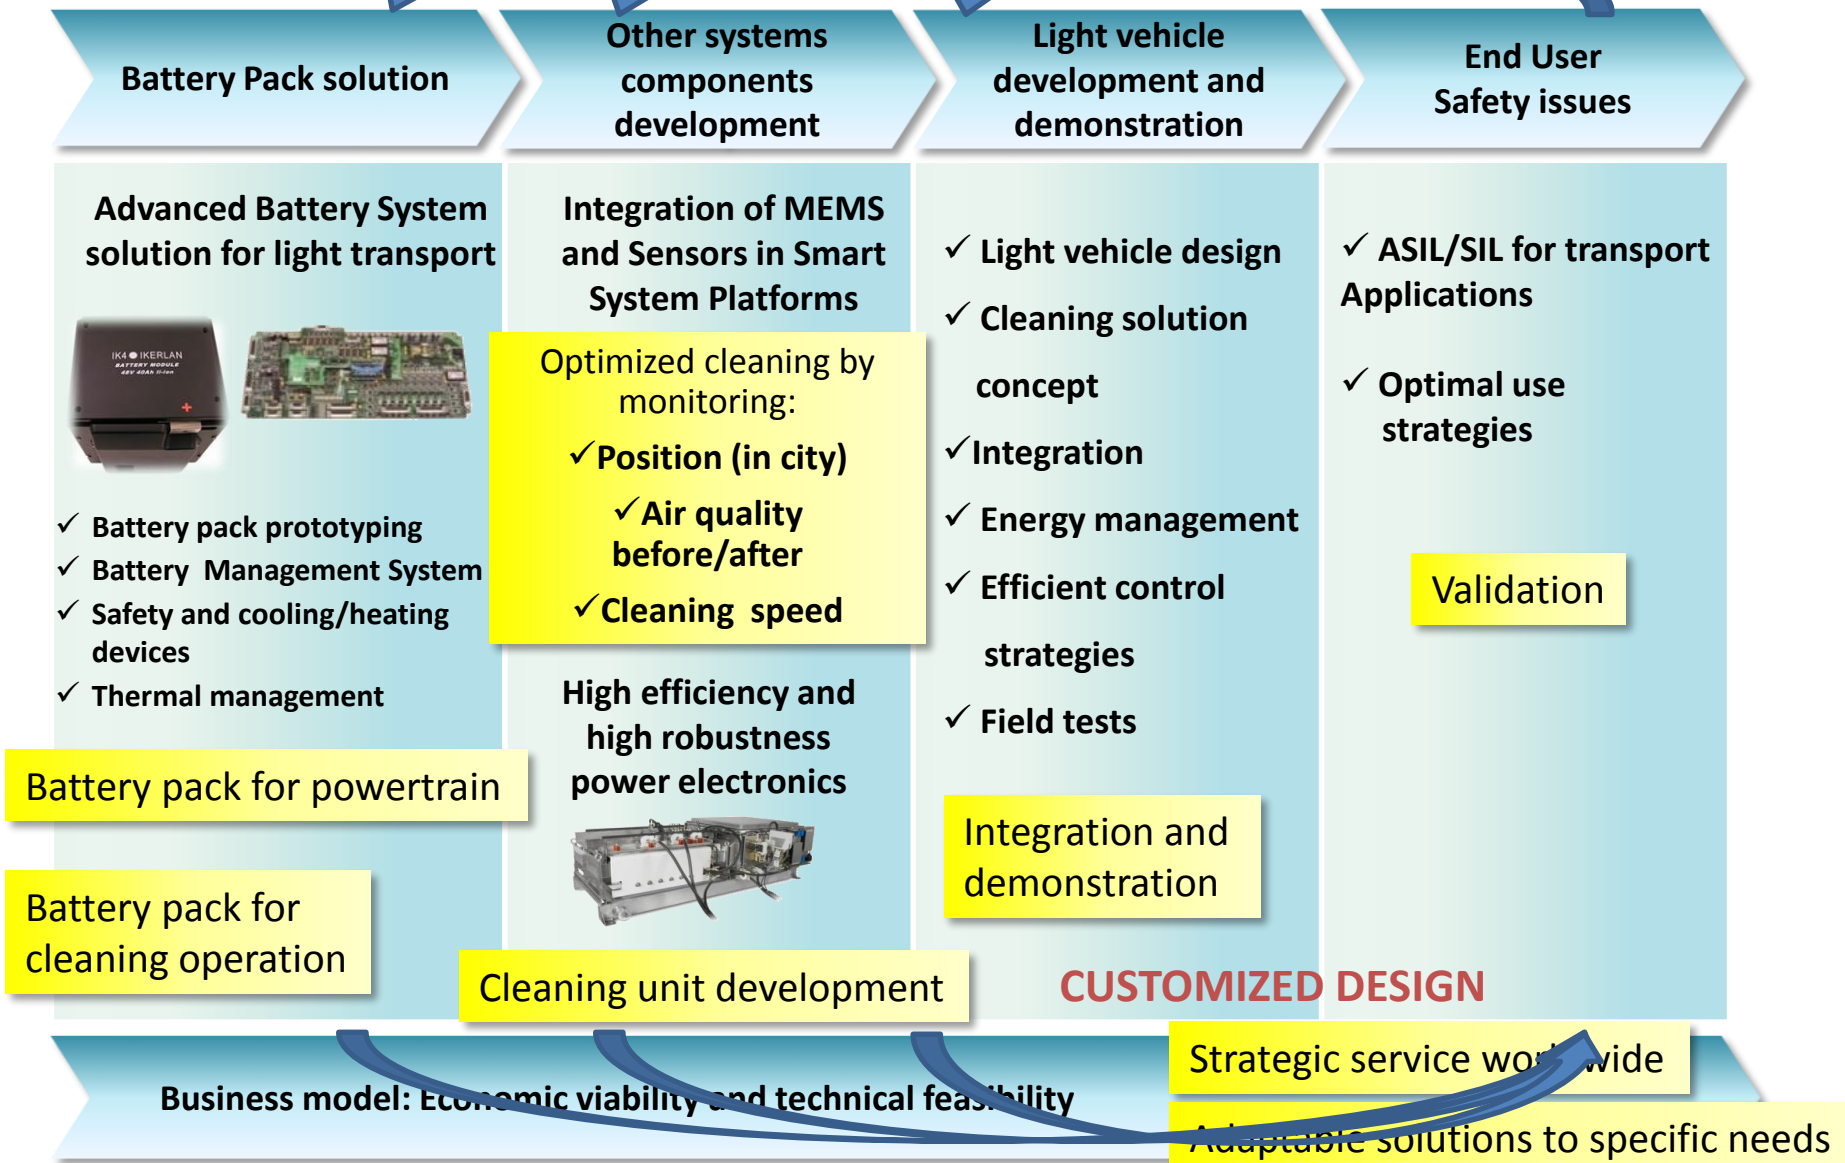

Safe

Smart

Diagnostics

CLEAN

Develop a European competitive technology . Highly efficient, safe, quiet and flexible solutions for keeping our cities clean
